

Customer Shipment Tracking API

Getting Started

This **API** is used for tracking the s/men handed over to Trackon. The s/ment is given by Customer/Franchisee. Once the physical s/ment is booked in Trackon system, that this API can track AWB No. The API will provide the tracking history (Point to Point) of the Docket/AWBNo passed.

How does it Works

This is the web API which is exposed by TRACKON to allow customer to get the detail of the s/ments along with the Last (latest) tracking status of the shipment/Reference No. It provides the summary tracking of the AWB/Reference No entered and output is in JSON format.

Access to Server Link

<https://api.trackon.in/CrmApi/t1/AWBTrackingCustomer?AWBNo={AWBNo}&AppKey={AppKey}&userID={userID}&Password={Password}>

Raw Header => Content Type: application/json; charset=utf-8

Method: GET

API Input and Output Details

Service Input

There is only four parameter to be passed. The Sales/CRM coordinator will provide this.

Sr#	Attribute Name	Data type (Max length)	Remarks	Type
1	AWBNo	Varchar(15)	Docket number	Mandatory
2	Appkey	Varchar(100)	Authentication	Mandatory
3	userID	Varchar(10)	Authentication	Mandatory
4	Password	Varchar(15)	Authentication	Mandatory

Service Output

The output in Jason format.

Explanation of Summary Fields

Field Name	Data Type	Remarks
AWBNO	string	Docket number
BOOKING_DATE	string	Booking Date (dd/mm/yyyy)
CURRENT_CITY	string	Current location of S/ment
CURRENT_STATUS	string	Current status of S/ment
DESTINATION	string	Destination of S/ment
EVENTDATE	string	Last Event Occurred Date (dd/mm/yyyy)
EVENTTIME	string	Last Event Occurred Time (HH:MM)
NDR_REASON	string	Reason of S/ment if NDR
ORIGIN	string	Origin of S/ment
PINCODE	string	Destination pincode
REF_NO	string	Customer Order No or Reference No
TRACKING_CODE	string	Unique Tracking code with respect to tracking Status (Ref Table: TrackCode)
PRODUCT	string	If available
SERVICE_TYPE	string	AIR / Surface
NDR_REASON	String	If NDR Status punched

Explanation of Details Fields

Field Name	Data Type	Remarks
CURRENT_CITY	string	Docket City in
CURRENT_STATUS	string	Current status of S/ment
EVENTDATE	string	Last Event Occurred Date (dd/mm/yyyy)
EVENTTIME	string	Last Event Occurred Time (HH:MM)
TRACKING_CODE	string	Unique Tracking code with respect to tracking Status (Ref Table: TrackCode)

Explanation of Response Status Fields

Field Name	Data Type	Remarks
ErrorCode	String	Null
Message	String	Actual message provide bt API
StackTrace	String	Null
Errors	String	If any

Table : Track Code (Detail of Tracking Status)

Tracking Code	Detail	Description
RPRU	Reverse/Pickup Request Upload	Request raised for Reverse/Pickup
PRSG	Pick Up Gen	PRS <PRSNO> prepared
PRSS	Pick Up Closure- Successful	Pickup Successful
PRSN	Pick Up Closure- Fail	S/ment Failed to pickup due to @<Reason>
RPRS	Reverse Pick up Generation	Request raised for Reverse/Pickup
RPSS	Reverse Pick Up closure - Succ	Return s/ment Picked up and Booking processed
RPSN	Reverse Pick Up closure - Fail	Reverse S/ment Failed to pickup due to @<Reason>
BOKN	Non Document Booked	S/ment booked
BOKD	Booked	S/ment booked
SPHO	SP HO made	In Transit From
MFTD	MFT/Bagging	Processing Bag for <MFT Dest>
MFTF	MFT/Bagging(Forwarding)	Processing Bag for <MFT Dest>
MMFT	Master Bag/Bag in Bag	Processing Bag for <MFT Dest>
VFWD	Master Bag/Bag in Bag	In transit to <FWD Dest>
CDOT	CDOUT	In transit to <CD Dest>
CDIN	CDIN	Arrived Bag at location
CDIE	CDIN Excess	Arrived Bag at location
IMMF	Master Bag receiving (same datet & Time)	Arrived Bag at location
VMMF	Vehicle receiving (same datet & Time)	Arrived Bag at location
IMFT	MFT Inscan	Processing at <CurrentLoc>
IMFE	MFT Excess	Processing at <CurrentLoc>
IMFS	MFT Short	Processing at <CurrentLoc>
IMFD	MFT Damage	Processing at <CurrentLoc>
ISMT	Docket Inscan (TS)	S/ment Arrived
ISMD	Docket Inscan (Dest Branch)	S/ment Received
ISTE	Docket Excess (TS)	S/ment Arrived
ISDE	Docket Excess (Dest Branch)	S/ment Received
ISMS	Docket Short	S/ment Arrived, Investigation of s/ment under Process
ISDD	Docket Damage	S/ment Arrived, Investigation of s/ment under Process
ISSS	Content Short	S/ment Arrived, Investigation of s/ment under Process
MIRT	Misroute Docket	Misroute

Strictly Confidential || Trackon Couriers PVT LTD

MIRB	Misroute Bag	Misroute
DRSG	DRS Gen	Out for Delivery
DRMG	DR with MFT	In Transit to <To Hub>
DRBG	DR	Delivery manifest Prepared
DRSF	DRS on BA	Out for delivery
DDUB	DRS Update- Del (Branch)	Delivered
DDUF	DRS Update- Del (FR)	Delivered
DDUA	DRS update - del - Android	Delivered
DNUB	ATMP	Undelivered due to <Reason>
DNUF	ATMP	Undelivered due to <Reason>
DNUA	ATMP	Undelivered due to <Reason>
RSET	Set RTO	S/ment marked for RTO Due to < Reason>
RMFT	RTO MF	Processing RTO Bag for <MFT Dest>
RIST	RTO Docket Inscan (TS)	RTO s/ment Arrived
RISR	RTO Docket Inscan (Dest Branch)	RTO s/ment Received
RITE	RTO Docket Excess (TS)	RTO s/ment Arrived
RIRE	RTO Docket Excess (Dest Branch)	RTO s/ment Received
RHOB	RTO HO Gen(S/ment Not Booked)	RTO Out For Delivery without processing Reason <Reason>
RHOD	RTO HO Clos- Del (Even s/ment not Booked)	RTO Delivered
RHON	RTO HO Clos - Undel	RTO Undelivered due to <Reason>
HELD	Heldup	Investigation of s/ment under Process
RELE	Remove from Heldup	S/ment Released & processed
